EDUCATION

Toronto Metropolitan
University (TMU)
2023-2026

Bachelor of Science (Honours), Computer Science (Co-op)

CGPA: 3.74 / 4.33 (Dean's List 2023-2025)

Dean's List – Toronto Metropolitan University (2023-2025)

Relevant Coursework: Algorithms, Software Design, Database Systems, AI & Machine Learning, Cloud Computing

Certification: Google IT Support Specialization (Coursera, 2024)

PROJECTS

MoodSyncher (AI-Driven Web App) **React, Tailwind, TMDB API, OpenAI**

- Built a movie recommender that embeds user mood prompts and matches them to pre-processed TMDB vectors for semantically coherent results.
- Implemented async orchestration with React hooks and caching to cut median response time ~25%.
- Added context-aware top-K re-ranking (recency + diversity priors) and evaluated with NDCG on offline samples.
- Separated offline embedding/index pipelines from online inference to meet latency targets and keep experiments reproducible.

Task Manager App (Full-Stack) **C#, .NET, SQL Server**

- Engineered a multi-tier CRUD system with modules for tasks, sessions, and JWT-based authentication.
- Designed normalized schemas and implemented stored procedures/transactions for integrity under concurrent access.
- Integrated DI and middleware pipelines for consistent validation and error handling across the .NET backend.
- Containerized API + SQL via Docker for reproducible builds and test environments.

SmartFlow Automation **Power Automate, SharePoint, Excel**

- Architected an event-driven onboarding workflow using HTTP triggers and SharePoint list webhooks with retry + escalation policies.
- Built an Excel/SharePoint audit layer to track workflow metrics, reducing manual data entry ~40%.
- Added fault-tolerant branches with termination rules to prevent stuck runs and ensure timely notifications.

TechTriage Helpdesk Site **HTML, JavaScript, Markdown**

- Shipped a static knowledge portal using templated Markdown components and embedded demo videos for versioned SOPs.
- Configured client-side search (lunr.js) for instant retrieval, reducing repeat tickets ~20%.
- Standardized content structure (code samples, steps, FAQs) to speed contributor updates.

OpenGL 3D Model – Robocop **OpenGL, C++**

- Built a hierarchical humanoid using OpenGL's transformation stack; applied matrix ops for rotation, scaling, translation.
- Implemented Gouraud shading in GLSL; organized geometry with VBOs for efficient draw calls.
- Set up camera projection/view mapping and validated perspective with linear-algebra transforms.

WORK EXPERIENCE

Mobile Komak, Ahwaz,
Iran
Aug 2021 – Feb 2022

IT Support Technician

- Ran network diagnostics via command-line tracing; wrote small Python parsers for log triage/anomaly hints, speeding root-cause analysis ~20%.
- Configured Windows/Linux dual-boot images for rapid HW/driver testing and kernel compatibility checks.
- Managed device lifecycle: imaging, secure data erasure, and e-waste handling to meet compliance.

Toronto Metropolitan
University
Jul 2024 – Feb 2026

International Peer Supporter

- Onboarded 400+ students (D2L, TMU email, Zoom, 2FA), improving first-term readiness.
- Delivered tech support, including configuring network access on student laptops and assisting with common computer issues; also handled printing tasks for students and staff when needed.
- Co-facilitated academic-skills workshops; tracked attendance/feedback and shared insights with staff.
- Scheduled via Calendly and documented interactions for follow-ups and accessibility.
- Used Google Sheets to track students and build dynamic student lists using functions and formulas (e.g., filters, lookups, conditional logic).

Toronto Metropolitan
University
Apr 2024 – Apr 2026

President, Iranian Students' Association (ISAMET)

- Led a 15-member exec; set cadences, ownership, and shared files (Teams/Drive/Excel) to tighten coordination.
- Grew event participation ~35% (100+ attendees) through structured programming, outreach, and post-event analysis.
- Produced onboarding playbooks and term-end reports to ensure continuity and reduce ramp-up for new execs.
- Coordinated multi-stakeholder events (insurance/UHIP info, awards, intramurals, etc.); handled logistics, risk forms, rooms, and comms.
- Managed budgets, vendors, and timelines; documented processes to standardize future events.

TECHNICAL SKILLS

- **Languages:** Python, Java, C#, C/C++, SQL, JavaScript, HTML/CSS, PHP
- **Frameworks & Tools:** React, Node.js, Express, .NET, Git, Docker, REST APIs, JSON/XML
- **Databases:** SQL Server, MySQL, SQLite, MongoDB
- **Cloud & AI/ML:** Microsoft Azure, Pandas, NumPy, Matplotlib, scikit-learn, Hugging Face
- **Enterprise & Automation:** Power Automate, SharePoint, Microsoft 365, Teams
- **Other:** OpenGL, Unix/Linux scripting, Excel, Jupyter Notebooks
